OPIS PROBLEMA	<p>Tvrtka ConvaTec je dragovoljno pokrenula Sigurnosno-korektivnu radnju na terenu (FSCA) u obliku Dopisa za klijenta za određene šifre proizvoda i brojeve lotova gore navedenih ostomijskih proizvoda.</p> <p>Tvrtka ConvaTec je primila pritužbe povezane s uporabom Konveksnih dvodijelnih podložnih pločica , na kojima početni otvor (otvor za stomu) nije centriran na proizvodu koji je proizveden u razdoblju od veljače 2017. do rujna 2018. Točnije, imali smo, globalno promatrano, tri slučaja gdje je uporaba konveksne dvodijelne podložne pločice s necentriranim središtem dovela do zarezivanja stome. Ovi rezovi nisu zahtijevali hospitalizaciju i krajnji korisnik je mogao riješiti problem. Sveukupni rizik od ozljede je nizak. Ipak, kako je rizik moguće vizualno otkriti, poduzimamo mjere opreza tako što obavještavamo klijente o ovom problemu kako bi krajnji korisnici mogu obaviti detaljnu provjeru njihovih proizvoda i vidjeti je li proizvod: a) proizveden tijekom ovog razdoblja i b) vizualno necentriran.</p>

Kako uočiti razliku između neispravnog i ispravnog proizvoda	<p><u>Potvrda određenih šifri proizvoda i brojeva lotova</u></p> <p>Ovaj je problem ograničen na određene šifre proizvoda i brojeve lotova, navedene u Privitku 3.</p> <p>Svi kupci mogu pogledati Privitak 3 kako bi potvrdili je li njihov proizvod obuhvaćen ovom Obavijesti o sigurnosti proizvoda.</p> <p>Na zahtjev i na temelju računa, omogućit će se kupcima uvid u popis. Za pomoć se obratite članu tima Službe za kupce tvrtke ConvaTec.</p> <p>Za informacije o proizvodu navedenom u Obavijesti o sigurnosti, krajnji korisnici mogu pročitati Privitak 1 u kojem su primjeri oznaka pakiranja na kojima su istaknuti mjesto LOT broja i šifre proizvoda / REF br.</p> <p><u>Vizualna potvrda od strane krajnjeg korisnika potencijalno neispravnog proizvoda za ostomiju:</u></p> <p>Za dodatne informacija o načinu vizualnog pregleda potencijalno neispravnog proizvoda krajnji korisnici proizvoda za ostomiju mogu pročitati Privitak 2 i/ili kontaktirati Korisničku službu FSCA ukoliko imaju dodatnih pitanja.</p>

Obavijest o sigurnosti medicinskog proizvoda

Poštovani korisniče proizvoda za ostomiju,

Pišemo kako bismo Vas izvijestili o vizualno uočljivom problemu koji pogađa konveksne dvodijelne kožne barijere proizvedene od veljače 2017. do rujna 2018., osobito gdje je početni otvor (stoma otvor) pomaknut van središta. (Za popis neispravnih proizvoda, pogledajte Dodatak A ovog dopisa.) Rizik od ozljede je mali, i ograničen je na određene lotove proizvedene tijekom ranijeg, navedenog vremenskog okvira. Nemaju svi proizvodi ili kutije koji pripadaju specifičnim lotovima ovaj problem. Ipak, kako je rizik moguće vizualno otkriti, poduzimamo mjere opreza tako što obavještavamo klijente o ovom problemu, pa možete obaviti detaljnu provjeru Vašeg proizvoda kao biste vidjeli je li:

- a) proizveden tijekom ovog razdoblja i
- b) vizualno necentriran.

Naše evidencije ukazuju da biste Vi mogli biti u posjedu ovog proizvoda. Ispod se nalaze slike sa primjerima:

Šaljemo ovaj dopis kako biste bili svjesni problema i navodimo korake koje možete poduzeti ako identifikirate proizvod s pomaknutim središtem na mjestu uporabe.
